SUMMARY

Java Backend Developer with 2 years of experience in building scalable microservices using Spring Boot, PostgreSQL, MongoDB, Cassandra, and Keycloak (OIDC). Skilled in multi-tenant architecture, RBAC security, API integrations, schedulers, and distributed systems. Worked across fuel automation, salon SaaS, and smart parking platforms also proficient in React.js with hands-on experience. Strong interest in system design and delivering clean, high-quality backend solutions.

TECHNICAL SKILLS

Backend : Java, Spring Boot, Spring Security, JPA, Hibernate, REST APIs, Microservices, Keycloak.

Frontend : React.js, JavaScript, TypeScript.

Databases : MySQL, Postgres, MongoDB, Cassandra, Redis.

Tools : Git, GitHub, Postman, Maven, Gradle, Docker, SonarQube.

WORK EXPERIENCE

Software Engineer , Hashstudioz Technologies Pvt Ltd

Nov 2023 - Oct 2025

- Worked as a Java Backend Developer on 10+ microservices built using Spring Boot.
- Designed and maintained 30+ REST APIs supporting multiple business workflows.
- Optimized 20+ complex database queries, improving API response time by 25–30%.
- Led Keycloak (OIDC) integration for 3-tier multi-tenant architecture (System Admin, Tenant, End User).
- Implemented RBAC-based security across 5+ user roles and protected sensitive business operations.
- Improved system performance using Redis caching and optimized data models, reducing load on databases by ~40%.
- Contributed to system architecture and API design for scalable deployments.

PROJECT

E-Parking System

Aug 2025 - Oct 2025

- Developed automated entry/exit workflows capturing timestamps and active parking sessions.
- Established a pricing rule engine applying weekend discounts, EV discounts, day/night pricing, and hourly/daily rate logic.
- Created REST APIs for admins to configure zones, lots, vehicle rules, and tariffs.

SpaSalon — Appointment Booking System

Apr 2025 - Jul 2025

- Designed complete microservice architecture for the platform.
- Implemented multi-tenant flow for system admin, salon admin, and salon users.
- Designed booking logic including service selection, staff allocation, and slot management.
- Collaborated with frontend teams using React.js to enhance booking workflows.

Fuel Management System

Jul 2024 - Mar 2025

- Architected core backend microservices and integrated them via API Gateway.
- Implemented multi-tenant architecture with system admin, tenant, and pump admin role flows using Keycloak OIDC RBAC.
- Built schedulers and data pipelines to process high-frequency pump data from Cassandra into PostgreSQL for reporting.
- Designed master data linkage (pump → dispenser → nozzle) and built reporting modules for consumption, transactions, and operational logs.

EDUCATION

Computer Science Engineering , Galgotias University

Sep 2019 - Jun 2023
